

Microsoft 365

Business Premium

Microsoft 365 Business Premium

Strengthen security, reduce cost and unlock
advanced AI productivity with Copilot Business

UNLOCK MORE SECURITY, CONTROL & FUTURE-READY PRODUCTIVITY

Organisations today face more cyber risk, hybrid work challenges and expectations to do more with less.

Microsoft 365 Business Premium delivers the enterprise-grade security and device management your teams need in addition to cost savings and the ability to adopt powerful AI productivity tools at lower cost.

WHY UPGRADE TO BUSINESS PREMIUM?

Stronger Protection Against Cyber Threats

Business Standard: Basic email security.

Business Premium: Advanced protection that stops phishing, ransomware, and account takeovers before they happen.

What this means in practice:

Stops fake emails that trick staff into sending money or passwords (Phishing protection)

Blocks dangerous links and attachments before anyone clicks them (Safe Links & Safe Attachments)

Warns you if someone tries to log in from an unusual location or device (Suspicious sign-in alerts)

Keeps ransomware and malware out of your files and emails (Real-time scanning and isolation).

Why it matters: Avoid costly downtime, data breaches, and reputational damage.

Secure Remote & Hybrid Work

Business Standard: Users can log in from anywhere, with minimal checks.

Business Premium: You control who can access your data, from which devices and locations, keeping company information safe even if a laptop is lost or stolen.

Why it matters: Peace of mind when staff work remotely or travel.

Company Devices Under Your Control

Business Standard: No central control, each device is managed manually.

Business Premium: You can lock, wipe, or update any company device remotely if it's lost or compromised.

Why it matters: Prevent sensitive data leaks and reduce IT headaches.

YOUR MICROSOFT LICENSE INCLUDES TOOLS
COMMONLY DUPLICATED ACROSS A BUSINESS.

Compliance &
Professionalism

Business Premium:
Helps you meet industry standards for data protection and GDPR.

Why it matters: Avoid fines and show clients you take security seriously.

Ready for AI
and Modern Tools

Business Premium:
Ensures your Microsoft environment is secure and configured for Copilot and other AI features.

Why it matters: Stay ahead with productivity tools without risking data exposure.

Reduce
External Spend

Business Premium: We need something in here to match the other two columns for content.

Why it matters: Retire separate antivirus, endpoint management and email filtering tools - lowering total cost.

BUSINESS STANDARD VS BUSINESS PREMIUM

Feature Area	Business Standard	Business Premium
Core Office Apps	✓	✓
Teams & Email	✓	✓
One Drive (1TB)	✓	✓

Prerequisite for Novem Secure MSSP	✗	✓ Required

MICROSOFT 365 COPILOT BUSINESS: AI TO WORK SMARTER

Microsoft 365 Copilot Business is the new SMB-friendly Copilot licence from Microsoft. It delivers the same full Copilot AI capabilities without requiring a high-tier enterprise plan.

What Copilot Business Delivers:

- Summarises meetings and emails
- Drafts documents, messages and content faster
- Generates insights from organisational data
- Automates repetitive or manual tasks

Key Business Benefits:

- Faster, more informed decision-making
- Reduced administrative workload
- Higher productivity and consistency across teams
- Can be added as a paid add-on to Business Standard or Business Premium licences
- Offers a more accessible path to AI-enabled productivity

FINANCIAL & OPERATIONAL ROI

Business Premium consolidates key technologies, eliminating stand-alone security, MDM and email filtering licences for many customers.

Outcome: Lower overall spend, fewer licences to manage, and stronger cyber posture.

Drive measurable business value with Microsoft Business Premium and Copilot — research shows SMEs can achieve up to 353% ROI over three years, while each user can save nearly 9 hours per month on routine tasks, enabling teams to focus on strategic work.
